ONLY POWDERLY'S DAILY MANIFESTO TO KEEP ALIVE THE STRUGGLE.

Chief Arther of the Brotherhood of Engineers Ecturus Powderly's Recent Charges With Interest-No New Move Contemplated by the Enights at Present, The effects of the recent strike on the New York Central are fast disappearing. The railroad authorities are quietly operating the road and the leaders of the Knights of Labor are engaged in the harmless pastime of addressing statements to the public. This is what Mr. Powderly gave out yesterday:

the case, but it is only during such strikes as this that the eyes of the people are opened to the manner in which great corporate interests age being served at the expense of the masses. Valuable franchises have been voted to these corporations, concessions have been made to them, and yet they claim that they do not pay sufficient to enable them to adequately reward their employees. There must be some reason for this. A private concern that could not pay would not continue to do business. In Albany six miles of street were voted to the New York Central on lease for a yearly con-Sideration of \$6,000. If private individuals had seen granted the use of that same territory they would have had to pay at least \$100,000 for it. We find, however, that there are wheels within wheels. The New York Central owns the Wagper palace car concern, but the dividends of that institution are not shared in by the stockholders of the New York Central; they go to the manager of the Wagner Company. The Blue Line of freight cars is owned by the New York Central, and it is a question whether the stockholders know what the earnings are. The great bridge at Albany is also owned by the New York Central, but I am told that it is held as a separate piece of property and pays separate dividends to a part of the stock-

"Great public concerns, and the railways are such beyond shadow of doubt, should transact their business beneath the public eye, and there should be no concealment of anything that concerns the public. The railways are no more the property of private individuals than the national banks, and yet we have a Government officer whose duty it is to keep watch over the transactions of the banks, the Comptroller of the Currency. Not many months such as can be done by sharp, shrewd fellows, secured control of the Sixth National Bank of this city. Had it not been under Government supervision this nation would have experienced far more trouble than has been occasioned by the present strike. On the books of the company the stock was worth \$226. That was enough, and all that any man—honest man—could afford to pay for it, but the bank had a deposit of about \$4,000,000, and in corporations the owners of the majority of stock can rob the smaller stockholdors with impunity. The speculators in this instance could afford to, and did, pay \$600 for the stock, and thus having control entered the vanits and took enough securities to pay for the stock that they had bought. Unfortunately for the maiority of the maiority of the country, the attacked institution was not a railroad dealing with poor workmen; it was an institution working under Governmental supervision, and in less than half an hour the strong hand of the law was encircled around the necks of the manipulators, and to-day they are behind the bars. If the corporation assailed had been a railroad company or a manufacturing concern, with no Government Comptroller to look after them and to guard the interests of the stockholders and the public, these men would today be on the high road to wealth, and would in a short time be a power in the world of stock manipulation. Wo want Government control of railways, and it is because our offorts have lately had a telling effect that the counter influence is being directed against us.

We got through with Mr. Barry some time ago, and anything so irresponsible a man may have to say will have no influence on the minds of thinking people. If he was wise he would never assert that any man was foolish enough to offer him \$100,000 for something he did not possess, and when history has recorded the fact that it was the Curtin Congressional Investigating Committee, acting in conjunction with the members of the General Executive Board, that ordered that strike off, it seems to m such as can be done by sharp, shrewd fellows, secured control of the Sixth Nationa

We will do what lies in our power to aid you and win that recognition you seek, and in this pladging our selves we feel that we speak for the whole order. But a selemp duty rests for fulfillment with the striking men: Keep away from the company's property. Do not congregate in groups snywhere except in your sanctuaries. Make no threats, either against the company or any other person or thing. sanctuaries. Make no threats either against the company or any other person or thing.

And when opportunity offers have some of your coolest members reason with those who have taken your places with a view to convincing them that they are acting unmanfully. Necessity may have driven them to take your place, and they must be treated as kindly as possible. Remember that every man of you is being watched, your focusteps are being dogged, and even a joint promark may sorre to fasten on you a crime of which you would scorn to be guitty.

Resp away from the rum shops and frown down every attempt to induce your brothers to even enter malores. At least until this trouble ends. Hy taking this course you will strengthen our hands, and public opinions to the course in the course of the course in the course of the

When Powderly learned that the circular had been made public, he said:

"The secret circular which some recreant has given to the public was intended for members of assemblies attached to D. A. 246 only and was not sect throughout the order. I have mothing to say in relation to it. I know that every effort will be made to urge our members to do some illeral act. Unworthy persons will seek admission to these assemblies for the purpose of inflammatory speeches and motions. It was to head off such fellows that I issued that circular more than for any other reason."

issued that circular more than for any other reason."

I have forgotten all about the strike," said Vice-President Webb at the Grand Central Station yesterday. "Our road is now in perfect running shape. So far as any further trouble is concerned, I can only say, what I have previously stated, that if anybody else is called out I don't believe any one will go out. I have nothing to say in reply to the vituperative remarks of Mr. Powderly and the other speakers at the Union square meeting."

D. A. 246 WILL DO NOTHING.

The Executive Board and the District As sembly Both Dodging Responsibility. ALBANT, Aug. 27.—Secretary Edward Portley. who is perhaps the best equipped of the D. A. 246 officers so far as intelligence and good judgment are concerned, informed a Sun reporter to-day that no strike of the K. of L. yet remainnig in the employ of the Central road had been ordered none would be ordered to-night, and unless some future general action was required they would not be called out. The Knights yet in the service of the company numbered about 800, and were scattered along the line at the inter-mediate stations and junction points. The calling out of men at such places would add nothing to their strength and would simply add to the number the order would have to support, whereas now the company was supporting them and at the same time giving them the opportunity to assist the strikers by contributing to their support. The attention of the D. A. 246 Board, so Portley said, was just at present directed upon the arrangements for meetings in this vicinity for which speakers

had already been sent out from New York. It is a very patent fact that both the General Executive Board and the Board of D. A. 246 are trying to shift the responsibility the one upon the other. The D. A. 246 officers with one accord assert that they are but obeying the orders of Powderly and his Executive Board. On the other hand, the General Board always sees to it that the report goes forth that D. A. 246 is to order this or that. The strikers have deserted their old loitering places, and the growing impression is that many will seek to go back immediately after Labor Day. Acting under authority from New York, Superintendent Bissell is accepting the best of the old men, but receives them only on the basis of new employees, their previous service counting for naught.

Nothing occurred to interrupt the steady progress of train 'raffic save the accident at Fairport. On receipt of the news of the wreck here the strikers were regaled with a builetin from district headquarters to the effect that the accident was due to the incompetency of upon the other. The D. the road's new employees. Superintendent Voorhees was in Abany to-day in consultation with Superintendent Hissell and the Central's attorney, the Hon. Hamilton Harris. Mr. Harris says that no legal complications have arisen or can arise from the employment of the Pinkerion guarda. The company hires them in the same way it engages a brakeman, and is no more responsible for the personal acts of the one than of the other. The question of a connecting read's obligation to handle the Central's freight will not come up. Mr. Harris asserts, as the freight is not Central freight but public freight, and legal obligation of a connecting line to receive it was settled by the courts in the C. B. and Q. fight.

"With the exception of a few places yet to fill in the Schenectadyland'albany yards we fall to observe any indications of a strike on our road," said President Horace G. Young further said that outside of the larger places like Albany. Troy, Schenectady, and Binghamton the Knights had no hold on the employees of the D. and H., and its managers by transferring men from the small country places along the line had been able to secure competent experienced men for work in the city yards and put new hands in the country. Trus, with only a small proportion of the K. of L. among their employees, it was difficult to effect a tie-up.

The letter was in response to a letter on and is the first written utterance of Mr. Arthur which fully defines his position toward the Central strikers and the Knights of Labor This is the letter: "CLEVELAND, O., Aug. 25.

Le in the present trouble on the New York Central and Hudson River road. The polley of the Brotherhood is well known to him and the public, as it has been repeatedly explained from the bublic platform and published in the newspapers. He says: Sometime ago I telegraphed him (meaning me) that I would meet him in Cleveland, and when I arrived there I could not find him high or low. I learned that the telegram had been received by him, but my efforts to locate him were fruitless."

"Now, the facts in the case, as near as I can recollect, are these: Bome four years ago I received a telegram from Fowderly requesting me to meet him at the Union Depot in Cleveland on the arrival of a certain train on the Lake Shore road. Owing to my absence from the office I did not receive the message until after the departure of the train, and so informed him by letter, addressing it to him at Beranton. I do not believe he stopped over and looked for me. If he had he would have had no difficulty in finding me at my oxice or at my home, as I am always at one or the other when in Cleveland. He tells a wilful falsehood when he says other leaders have been unable to find me when they tried to do so.

"Any man who tries to find me when I am in Cleveland can do so with very little effort, and no man, whether a leader or a private in the ranks of labor, ever came to my office that he was not treated courteously."

"While I differ with men as to the best methods to be employed to secure certain ends. I have always been liberal enough to concede to every man the same rights and privilege I ask for myself. When the present trouble on the New York Central first occurred I ordered the engineers to abstain from all participation in it and to attend strictly to their own business. I gave the same advice when the strike occurred on the Gould system a few years ago. My advice to the Brotherhood of Engineers, when men employed in other branches of ralization to assist us. It is true some members of the order during the C. B. and Q. strike importune t

THE SWITCHMEN BLUNDERED.

They Can't Get Their Jobs Again and are Borry They Struck.

CHICAGO, Aug. 27 .- The strike of the stock yards switchmen is not likely to last much longer. The strikers have discovered that they committed a grave error in demanding an advance of wages without consulting the officers of their union, and every man of them would return to work to-morrow morning if he was invited to do so by the officers of the Railway Switching Association. The men are heartily sick of their present position. The Switchmen's Union has left them to shift for themselves. and the railroad companies will not take them

The switchmen of the different roads, who

back.

The switchmen of the different roads, who were at first supposed to be in sympathy with the atrikers, are now handling stock yards freight as last as it is delivered to them. Meat trains are now made up and sent out on schedule time. All the big packing houses will resume killing to-morrow.

The Aiton switchmen who struck on Sunday night because the company hired an objectionable road officer are still out. The atrikers attempted to wreck a freight train at Thirty-first street to-day, but Police Capt blea drove the men back in great disorder. Like the stock yards switchmen the Aiton strikers have been left alone to fight their battle. They will be beaton as the company is already moving trains without much embarrassment.

"There can be but one end to this strike," said General Manager Chappell to-day, "and we are glad that it has been precipitated. Our men have gradually gained power until they are insolont and wholly undisciplined. We have endeavored often to get rid of them to free ourselves from their clutches, but without result. The public safety demands the discipline of railway employees, and we can't have it with these men. Therefore we are glad to be rid of them.

Thousands of pounds of dressed meat in the cars, ited up on the Aiton road are spoiling, despite the efforts to re-ice the freight. The strike on this road is the worst now in progress in the city. Five hundred cars of freight are ited up at Brighton Park. The three switch engines which were running to-day were manned by officers of the road. One of them was wrecked to-night at the stock yards, and a heavy detail of police will patrol the thetracks to-morrow, when an effort will be made to break the backbone of the strike.

At 11 o'clock to-night it was reported that the stock yards and a heavy detail of police will patrol the thetracks to-morrow morning avery striker will receive his wages and be discharged.

Distatisfied With the Federation's Action ET.MTRA. Aug. 27.-It is reported that many trainmen and switchmen employed by the D., L. and W. road in this city will resign from their respective brotherhoods, and the reason generally assigned is their diseatisfaction with generally assigned is their dissatisfaction with the result of the Federation meeting at Terre Haute. While they concede that the Federa-tion could not take up the strike of the K. of L. yet they believe that some action should have been taken in the case of the Buffalo switchmen who were Brotherhood men, and discharged for refusing to take the piaces of the strikers. Some of the men declare that there will be a general desertion from the Brotherhood by the conductors, firemen, and switchmen employed uson this road. JOHN L AS AN ACTOR.

There Was a Great Crowd to See Him

BRIDGEPORT, Aug. 27.-The champion pugilist of the world formally declared to-night that he had surrendered prize-fighting for good flowery one of an actor. This declaration was only an incident of John L. Sullivan's début, and was made in a speech addressed to a big crowd that had been wrought up to the highest pitch of enthusiasm by the histrionic ability displayed by him. This city that has been the sink of so many new plays, has had its theatrical history lifted to the top notch of grandeur by "Honest Hearts and Willing Hands," which is the title of the play that has claimed John's maiden effort. Considering the brief trial in which the big fellow has had to prepare for the play and to rehearse, and the worry of Duncan B. Harrison, the "Earnest Actor," who shares with him the honors of the productions in appearing with a novice in an important part after an illness of four months, the success was great enough to start every pugilist from Fiddler Neary to Jack Dempsey out on the road with a stock company. The only indication of nervousness that John

Mr. Homer loded a description of his wife's assailants at the Grand Central police station, and the police are hunting for them.

AN ERRING PERMONT WIFE.

She Consents to Go Home, but Says She Will Not Live with Her Husband, OTTAWA, Aug. 27.-The other day a lawyer named Fred Arnold from Bethel, Vt., arrived at Waterleo, Quebec, with Charles Carey from Rochester, in the same State. Lawyer Arnold and Carey at once sought the office of an attorney, and had an interview. "I want a man ar-rested for adultery," said Mr. Arnold, "what roceedings must I take?" There is no law in this country to arrest

for adultery."

The Vermont lawyer was astonished, and turning to his client, remarked: "The Domin-ion won't help you much Carey."

Mr. Arnold then told his story. In January

last Mrs. Cary had run away to Canada with a man named Sharp. For a long time the deserted husband could get no clue to his erring wife, though he kept up a search. But lately information had been received locating the pair at South Stukely, Quebec. After their interview Mr. Arnold and Carey took a team at Lefebvre's livery and drove out there. They found Sherp in Mr. A. A. Sargeant's meadow, and Carey greeted him with: "Hello. Jack, how is the woman?" Jack trembled like a leaf, and was nearly overcome with excitement. For two months or more Sharp and Mrs. Carey had been living together as man and wife under Mr. Sargeant's roof.

Mr. Sargeant hitched up a horse, and, with the injured husband, started in search of Mrs. Carey, who was two or three miles away picking raspertries. Sharp wanted to accompany them, but Mr. Arnold prevailed upon him to remain with him. The meeting between Carey and his wife in the berry patch was dramatic. For a moment or two they stood and gazed at each other, the man with mingled feelings of love and anger, and the woman dazed and brought to bay. Carey was the first to break the silence:

love and anger, and the woman dazed and brought to bay. Carey was the first to break the silence:

"Will you come home with me. Maggie?"
Refuctantly Mrs. Carey said she would, but not to live with him.

"I don't want to live with you, either," replied Carey, "but I want you back in Vermont so I can get a divorce."

Sharp met the returning party on the road and had some hot words with Carey. Lawyer Arnold, who is built like an athlete, however, intervened. At the house Mrs. Carey packed her trunk and started for Waterloo with her husband's lawyer. Mr. Sargeant hustled Sharp off. The party registered at the Brooks House the same night and left the following morning for the Green Mountain State, Carey and Mrs. Carey string on different seats of the hotel bus as they drove to the train. Mrs. Carey is a blonde, about 35 years of age, and is not badlooking.
